

midterm1

A scatter plot showing the relationship between 'sex' (male/female) and 'gpa'. Two regression lines are shown: a solid blue line for males and a dashed red line for females. Two ellipses represent the error regions: a solid magenta ellipse for males and a dashed red ellipse for females. The magenta ellipse is centered around the male data points, while the red ellipse is centered around the female data points. The regression lines are labeled 'sex' and 'boards'.
